

## Industrial Networks Education Recertification (Exam Re-take)

### General Information

Course Code: IEN-EXAM  
Length: 1- 2 Hours

### Audience

This course is for anyone needing to retake a exam, for either initial certification or for recertification of expired certificate.

### Prerequisites

- Must have taken one of our Network Certification Courses in the past

### Profile

The Recertification or Exam Re-take is designed to allow anyone who either (1) didn't pass an exam the first time, or (2) has a certification nearing expiration (or expired), to take another test for possible certification, or recertification.

This course specifically is designed as an in-person proctored exam at one of our training facilities and **requires that you bring your personal laptop, as the tests are conducted through our online portal.**

**Please indicate which test you would like to re-take, following registration, by emailing [siemensci.us@siemens.com](mailto:siemensci.us@siemens.com).**

### Objectives

Participants who successfully pass their exam re-take will be given their CPIN or CEIN certificate. In the case of recertifications, a new certificate will be issued with the new expiration date.

All Industrial Networks Education certificates are valid for 3 years.

### Testing Times

Testing times vary based on course. Below is a guideline for the amount of time to block for your test.

Below tests typically take 2 hours:

- Switching and Routing in Industrial Networks:
- Switching and Routing in Industrial Networks with RUGGEDCOM
