101 Orientation for Systems Essentials for Technicians Upskill (SET Up) (US-SETUP)

Type

Instructor-led Learning

Duration and Continuing Education Units (CEU)

0.5 Hours (Schedule varies)
0 CEUs

Target Group

- Operators
- Maintenance Technicians
- Reliability Engineers
- Others

Short Description

This 30 minute virtual orientation session (via MS Teams) provides an overview of the Systems Essentials for Technicians Upskill (SET Up) learning pathway, program requirements, assessments, and expectations. Successful completion of the orientation is required before access to the SET Up self-paced online learning content.

Objectives

- Understand the SET Up learning pathway and program expectations.
- Review course requirements, assessments, and progression criteria.
- Learn how to access and successfully complete US-R-SETUP.
- Understand the pathway to ISET and Siemens MSA Level 1 certification

Content

- Program Orientation
- Learning Pathway Overview
- Course Requirements and Assessments
- US-R-SETUP Access and Navigation
- Progression to ISET
- Siemens MSA Level 1 Certification Pathway
- Resources and Support

Mandatory Prerequisites

Systems Essentials for Technicians Upskill SET Up: US-R-SETUP

SIEMENS

Note

Prerequisites

- Mechanical Aptitude
- Basic Math Skills

This orientation session introduces participants to the Systems Essentials for Technicians Upskill (SET Up) program and prepares them for successful completion of the required self-paced online learning course. Successful completion of the orientation is required before access to US-R-SETUP is provided.

US-SETUP and US-R-SETUP are required prerequisites for the Integrated Operations: Systems Essentials for Technicians (US-R-ISET) program and the Siemens MSA Level 1 (Certified Mechatronic Systems Assistant) certification pathway.
